

MagiHome

Innovative Compressed Foam Furniture: Your Global Partner

MagiHome: Smart Sleep, Zero Pressure

2025

Exporting to 30+ Countries

ABOUT MagiHome

MagiHome: Empowering Global Retailers with Innovative Sleep & Seating Solutions

Founded with legacy of foam expertise since 1989, MagiHome has evolved into strategic manufacturing & mass furniture retailers. We don't just furnish; we engineer, design, and deliver sustainable, and market-ready comfort products.

Scale & Stability: Operating across 100,000 sqm advanced production space, we ensure the volume and lead-time reliability required by global retail chains like JYSK.

Engineering for Logistics

Our proprietary Vacuum Compression Technology reduces shipping volume by up to 75%, decreasing both carbon footprint and delivery costs—ideal for both big-box retail and e-commerce.

Uncompromising Compliance

As strategic partner of Dow, BASF, and Bayer, our materials meet the world's strictest standards, including REACH (SVHC), CAL TB 17 and BS EN 2021.

ABOUT MagiHome

What makes us different:

- **Comfort is adjustable, not fixed**

Density, firmness, rebound speed — all can be customized based on your target market and price level.

- **Designed to fit your market, not our mold**

Seat depth, seat height, sofa size — we design **based on your selling space and customer habits**, not standard drawings.

- **7-day sample lead time**

Fast sampling means faster internal testing and decision-making.

- **Optimized for shipping & e-commerce**

Compressed size approx. **102×21×21 cm**, weight around **7 kg per sofa**.

Special waterproof & anti-tear protection ensures **no premature rebound during transit**.

- **Stable quality for scale-up**

Full inspection process + machine testing, defect rate controlled below **1%**.

- **Ready for sudden replenishment**

We can respond quickly to promotional spikes or seasonal restocking.

Whether you need a **cost-effective sofa with solid weight**, or a **high-end fast-rebound memory foam sofa**, we can support both — with clear material formulas and consistent output.

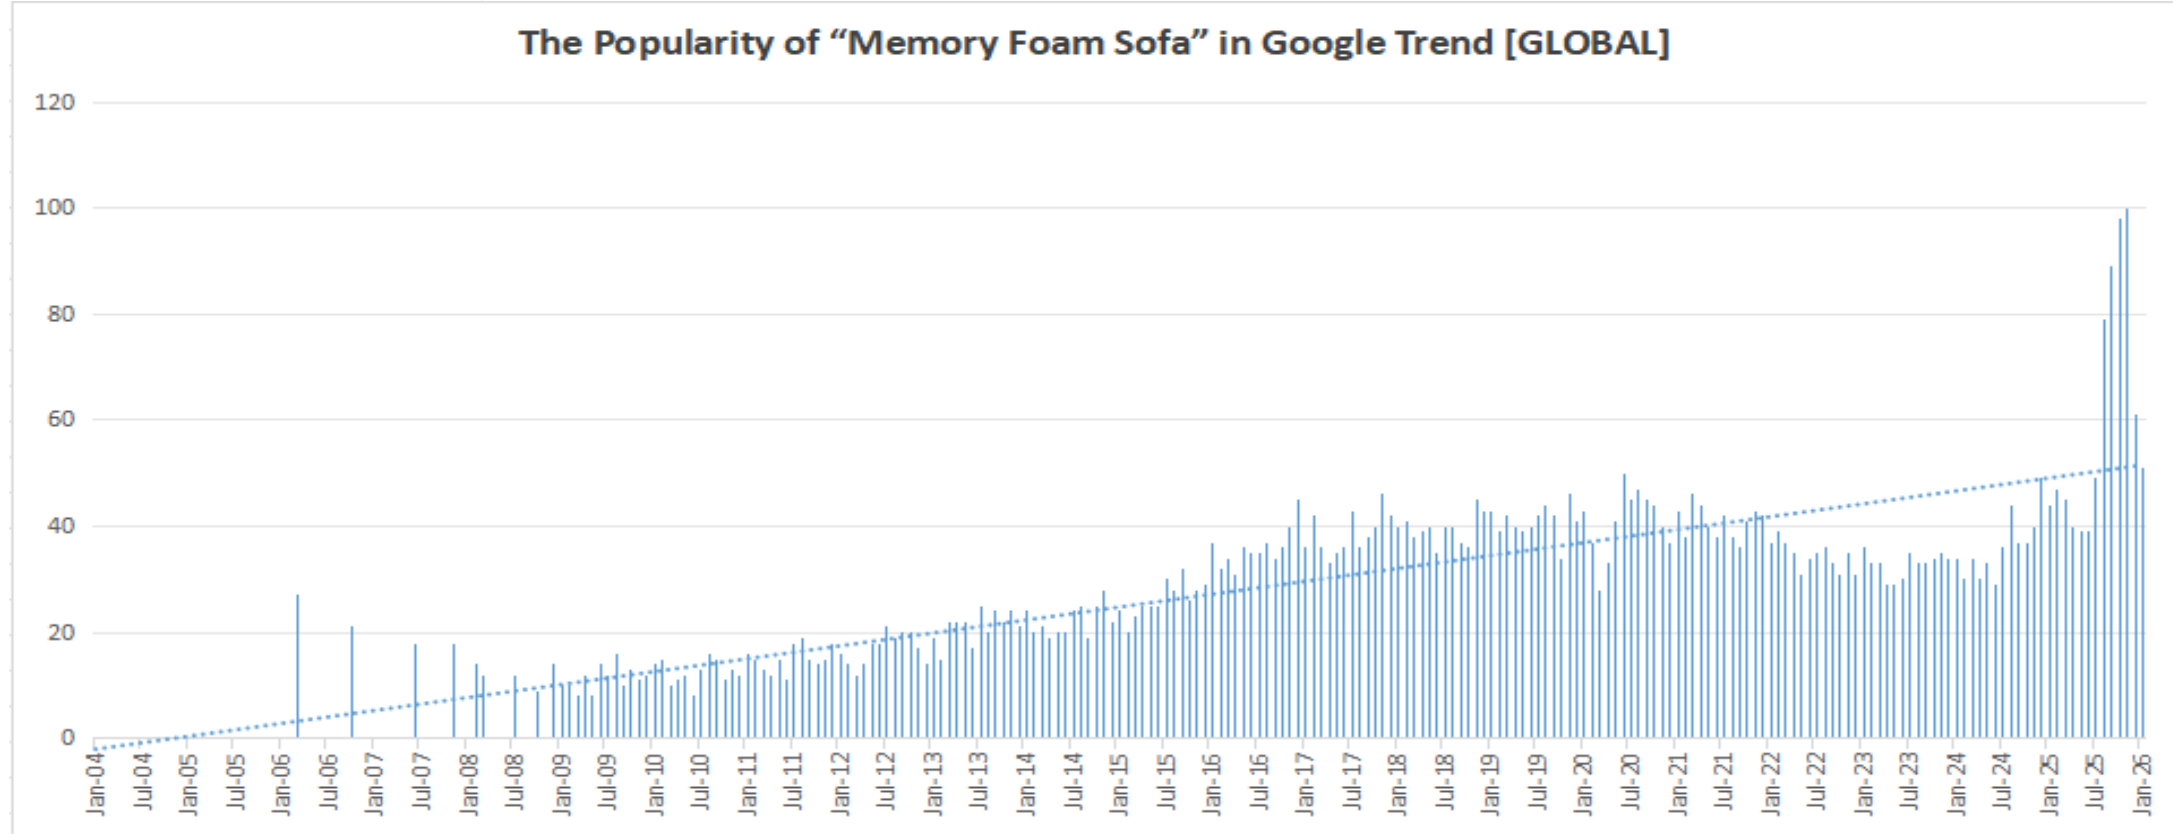

👉 *We usually start with a small test sample, then adjust until it fully fits your market.*

ABOUT MEMORY FOAM SOFA

Selling Amount in Amazon

Popularity in Google Trend

VACUUM COMPRESSION ROLL PACKAGING, INCREASE THE LOADING CAPACITY BY 4 TIMES!

WHAT IS A COMPRESSION SOFA?

Full sponge compression sofa refers to the sofa interior using Sunyalai compression sponge as a filler, the fabric uses Sunyalai special compression fabric, and the sofa as a whole or part of the structure can be reduced by compression technology, easy storage and transportation of the sofa.

BOX PACKING

Vacuum compressed roll packs in boxes are popular at furniture stores.

BAG PACKING

Vacuum compression package, this packaging will greatly save costs, containers can hold more products, suitable for large quantities of project mattresses.
